

WHAT MAKES CHEVIN HOMES NEW BUILDS MORE ENERGY EFFICIENT?

ENHANCED LOFT INSULATION

Embrace the warmth of a giant cosy blanket enveloping your home, reducing heat transfer between the inside and outside. Stay snug during winters and cooler during summers.

THERMALLY EFFICIENT WALLS

With improved insulation, less heat escapes, reducing your dependence on central heating and ensuring the generated warmth remains inside your home.

EFFICIENT LED LIGHTING

HIGH-PERFORMANCE WINDOWS AND DOORS

SOLAR PANELS

Complementing your existing energy-efficient boiler, solar panels harness the power of the sun to further boost your homes energy sustainability.

DRAFT FREE WITH EFFICIENT VENTILATION

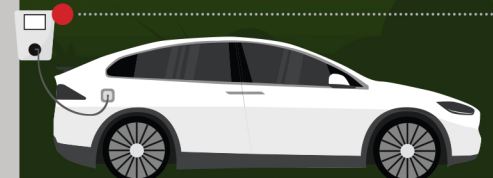

HIGHLY EFFICIENT WATER FITTINGS

EV CHARGING INFRASTRUCTURE

For homeowners with electric vehicles the convenience of charging your car from the comfort of your home is now a reality making eco-friendly transportation hassle-free.
